

# MPOS-A73 Android POS

**MPOS-A73 Android POS** is a terminal designed to provide traditional and innovative web services in point-of-sale environments from lottery sales, payment of winning tickets, utility bills, value-added services and so on.

## Sustain your operation with multi-functional support

MPOS-A73 Android POS ideally works in Android 4.2 platform with comprehensive support for various modes of operation.

- Lottery transaction processing
- Ticket Validation
- Other value-added services

MPOS-A73 can be integrated to eGame's M.Lottery platform or other third-party lottery system for secured lottery transactions. It can be implemented easily at points of sales such as department stores, convenience stores, gas stations, tax register location (VAT Raffle) and etc., allowing ease of business expansion.
